

**Front Street**

Dear Sarah

Would you please present this observation to the town council for consideration. Front Street has become a credit to the town, there is however, in my opinion, an issue on the 'south side' pavement from the glade toward the garage - specifically the difficulty faced by shoppers, particularly the elderly, less able or those in wheelchairs / mobility scooters or with pushchairs due to the obstructions created by the rectangular cast iron planters which create pinch points preventing free movement. These planters are not suitable for this narrow pavement on Front Street.

Possibly a more appropriate location could be found for them where they can be shown in a more attractive aspect.

Thanks and best regards
